No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                            Score

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Score
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  seq length: 0 seq length: 2000000000

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

```

New artificial promoter libraries - containing consensus promoter sequences and variable spacers, used to generate promoters for optimising expression of genes.

WPI; 1998-179062/16.

Jensen PR,

Hammer K;

(JENS/) JENSEN P R.

This is a Lactococcus lactis constitutional promoter sequence used in the construction of an artificial promoter library of the invention. The

```

This is a Lactococcus lactis constitutional promoter sequence used in the construction of an artificial promoter library of the invention. The

Claim 28; Page 43; 89pp; English.

New artificial promoter libraries - containing consensus promoter sequences and variable spacers, used to generate promoters for optimising expression of genes.

WPI; 1998-179062/16. Jensen PR, Hammer K;

New artificial promoter libraries - containing consensus promoter sequences and variable spacers, used to generate promoters for optimising expression of genes.

Claim 28; Page 44; 89pp; English

This is a Lactococcus lactis constitutional promoter sequence used in construction of an artificial promoter library of the invention. The the

Jensen PR, Hammer K;

New artificial promoter libraries - sequences and variable spacers, use expression of genes. spacers, used containing consensus promoter to generate promoters for optimising

Claim 28; Page 45; 89pp; English

This is a Lactococcus lactis constitutional promoter sequence used in the construction of an artificial promoter library of the invention. The

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Score

```

This is a Lactococcus lactis constitutional promoter sequence used in construction of an artificial promoter library of the invention. The

New artificial promoter libraries - of sequences and variable spacers, used expression of genes.

containing consensus promoter to generate promoters for optimising

New artificial promoter libraries - containing consensus promoter sequences and variable spacers, used to generate promoters for optimising expression of genes.

This is a Lactococcus lactis constitutional promoter sequence used in the construction of an artificial promoter library of the invention. The

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

sequences and expression of

genes

New artificial promoter libraries - of sequences and variable spacers, used

containing consensus promoter to generate promoters for optimising

This is a Lactococcus lactis constitutional promoter sequence used in the construction of an artificial promoter library of the invention. The
